---

## Soft Skills

---

Proactive, Self-motivated, Team Work, Communication

---

## Languages

---

Spanish (Native), English (Profesional), Portuguese (Medium)

I am a Venezuelan Systems Engineer and a Senior Technician in Informatics, although I had experience in Telecommunications and Technical Support, my career has focused mainly in the area of development in which I have more than 20 years of experience, with a broad portfolio of projects well done.

I have worked for several companies and companies, medium and large, among which is to highlight one of the most important, where I worked for 12 years, the Venezuelan state oil company, the main company in the country and one of the top companies worldwide, as Applications Analyst, position in which I develop several projects of short, medium and long range.

I have knowledge and experience in several server-side programming languages ( PHP, JAVA, C #, Python ), database engines ( MySQL, Postgres, MS SQL Server, Oracle ), obviously knowledge of SQL, No SQL Databases ( MongoDB, Firebase ), REST API, server management and Systems Operatives (Linux, OS and Window), FrontEnd Technologies ( HTML5, Javascript [ ES6 ], Typescript, CSS3 ), management of various Tools, Frameworks and Javascript libraries (jQuery, Sencha before called ExtJS, Angular, React, VueJS ), experience with content manager software (Wordpress, Joomla, among others), I have a Diploma in business intelligence.

I also have knowledge in graphic design tools, and even though I do not consider myself a designer, I have always been concerned not only with the functionality of the application but also with the user's experience when interacting with it, with a user-friendly interface, intuitive and easy to use.

I believe in initiative and innovation as tools to create quality work and to solve problems in interesting ways. I am pro open source, I work in fact as a collaborator in a project called: Php Object Generator and in another one called POG + EXTJS.

Outstanding self-motivation. Able to undertake leading roles and provoke new initiatives in research projects. High communication and interpersonal skills. I have over 20 years doing this, and still love it!.
